Architectural Review Board
Agenda

San Ramon City Hall
Training Room, First Floor
7000 Bollinger Canyon Road

April 9, 2026
1:00 PM*
Special Meeting
*** Please Note Earlier Start Time**

Agenda Questions: Contact Planning Services at (925) 973-2560, or planning@sanramon.ca.gov

1. Call To Order/Roll Call

2. Public Comment

At this time, members of the public are encouraged to address the Board on any item not already included in tonight's agenda. Comments should not exceed three (3) minutes. During public comment, members of the public are permitted to address the Board on items that are not on the agenda and are within the Board's jurisdiction.

Comments from the public may also be submitted by email to architecturalreviewboard@sanramon.ca.gov. No Board action can be taken at this meeting on issues raised during Public Comment. Written Public Comment emails must be submitted to the email above prior to the commencement of the meeting. Comments received by email will not be read aloud; however, they will be forwarded to the Board for their consideration. If you wish to make your comments heard, you must participate in the meeting.

3. Board Business

3.1 Election of Board Chair

3.2 Election of Board Vice Chair

3.3 Plan Review: Orchards Affordable Apartments (DP 2025-0004; AR 2025-0011; ENVR 2026-001)

Recommendation: Staff recommends the Architectural Review Board review and discuss the proposed Project, an affordable 100-unit four-story building with surface parking, and provide direction to the Applicant and staff recommending final architectural review.

CEQA: Staff is looking at potential environmental impacts of the proposed project given the previous office use and the proposed residential and mixed-use development profile assumed by the General Plan EIR. Upon completion of this review, staff will provide a specific CEQA determination along with the recommended course of action.

Staff Report by Analisa Mirzad, Associate Planner

4. Adjournment

This agenda is posted in accordance with Government Code Section 54954.2(a). To make a request for disability-related accommodation to participate in the meeting, please contact the City Clerk's Office 48 hours in advance of the meeting at 925-973-2539, or cityclerk@sanramon.ca.gov.

Attendee Conduct
There will be zero tolerance for any person addressing the Board making profane, offensive and disruptive remarks, or engaging in loud, boisterous, or other disorderly conduct, that disrupts the orderly conduct of the public meeting. Specifically, it is important for all speakers to adhere to the following guidelines for participation in this meeting:

a. No profanity or obscenity
b. Refrain from personal threats or attacks.
c. Refrain from hateful epithets and demeaning language based on any person's race, religion, sexual orientation, ethnicity, gender, or disability.
d. Respect all people that are present.

At the discretion of the Board Chair, a speaker may forfeit speaking time for any of the following reasons:

a. Exceeding the allotted time to speak;
b. Yelling, screaming, or other behavior that renders this Board unable to continue the meeting;
c. Excessive profanity or slander; Specific threats or "fighting words" that incite violence; or
d. Speech that is outside the subject matter jurisdiction of the Board or the specific agenda item in which you are speaking.

While the City of San Ramon upholds the First Amendment rights of all participants, we do not accept or endorse offensive or hateful comments made during our meetings. We celebrate the diversity of our community and strive to maintain a welcoming and inclusive environment for all.

Architectural Review Board Staff Report
Item No. 3.3

Date: **April 9, 2026**

To: **Architectural Review Board**

From: **Lauren Barr, Community Development Director**
Analisa Mirzad, Associate Planner

Subject: **Orchards Affordable Apartments (DP 2025-0004; AR 2025-0011; ENVR 2026-0001)**

Applicant:
Eden Housing
c/o Dixie Baus
22645 Grand Street
Hayward, CA 94541

Property Owner:
BR 6001, LLC
c/o Stephanie Hill
2600 Camino Ramon, Suite 201
San Ramon, CA 94583

Site Information:

Location:
6001 Bollinger Canyon Rd. (APN: 213-120-008) - See Vicinity Map, Attachment 1.

General Plan Designation:
Downtown Mixed Use, South (DMU-South)

Zoning Designation:
Downtown Mixed Use, South (DMU-South)

Site Description:

The subject property is approximately 1.85-acre parcel within the 92-acre Orchards Development Project site located at 6001 Bollinger Canyon Road (formerly the Chevron Corporation Office Park). The site is bordered by Bollinger Canyon Road and retail shopping to the north, the I-680 freeway to the west, single-family residential homes to the south, and office and mixed use to the east.

Background:

On October 2, 2025, the Applicant submitted a Preliminary Housing Development (PHD 2025-0005) for a new residential project consisting of 100 rental units located 6001 Bollinger Canyon Rd., APN: 213-120-008). On October 21, 2025, prior to expiration of a

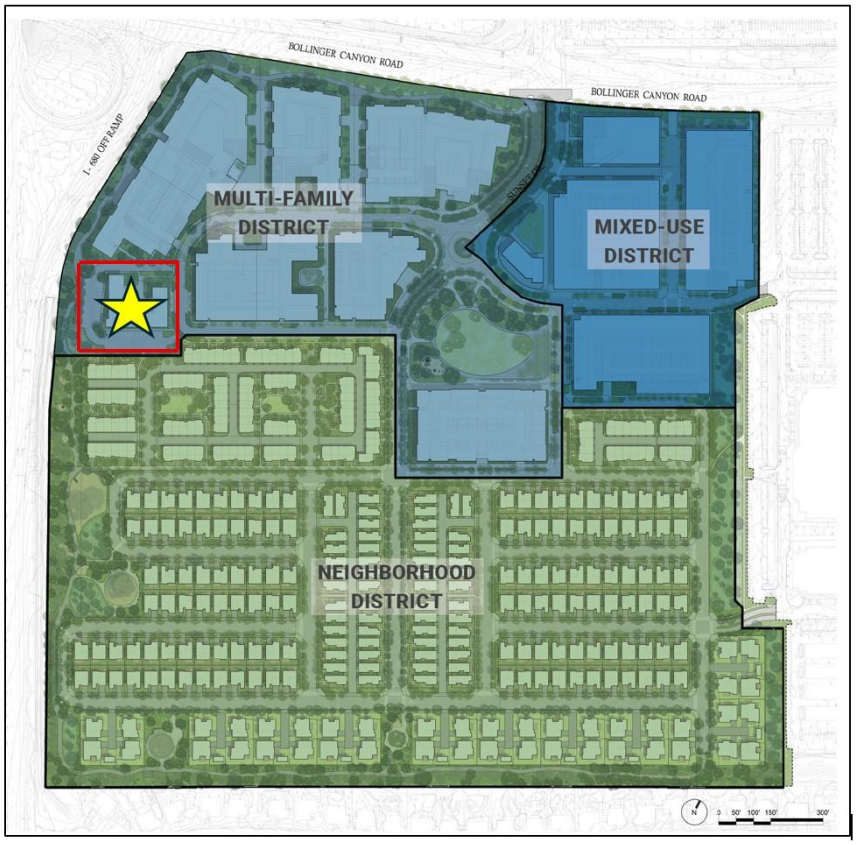
180-day period to maintain the development requirements in effect at submittal of the PHD application, the Applicant submitted Development Plan (DP 2025-0004) and Architectural Review (AR 2025-0011) applications for the proposed Orchards Affordable Apartments Residential Development Project. On November 4, 2025, the Planning Commission held a study session and provided feedback on the project and development applications filed by the Applicant.

As an SB 330 project, design review is limited to objective standards, however, the Applicant's architectural review application is being forwarded to the ARB for additional project feedback.

Project Description and Analysis:

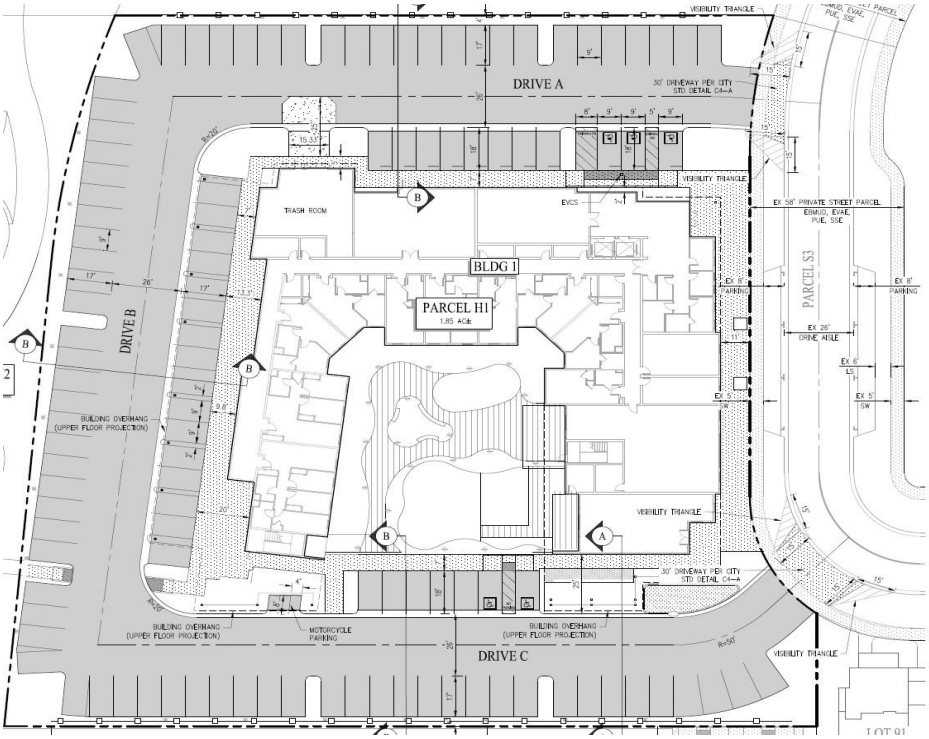
The Orchards Affordable Apartments Project is proposed within the Multi-Family district of the Orchards Master Plan outlined in Figure 1 below. The Orchards Affordable Apartments proposes to demolish the existing parking lot and construct a 100-unit, 80,444 sq. ft. four-story building with surface parking along with associated landscape and site improvements. All units, with the exception of one on-site manager's unit, will be deed-restricted to lower income households.

Figure 1: Orchards Master Plan Land Use Map



The project site has two primary driveway access points off Chevron Drive. Several project amenities are identified on the project plans including a community room, computer lab and after school gathering room. A daycare center to accommodate up to 25 children is proposed on the ground floor with an associated outdoor play area. The 100-unit building will provide a total of 110 surface parking spaces, with 10 of the spaces designated for daycare use. Two primary access points, Drive A and Drive C, will provide access to surface parking, with Drive C providing primary access to the daycare center (Figure 2).

Figure 2: Proposed Site Plan



Land Use and Development Standards

Land Use Designation and Zoning

The Project site has a General Plan 2040 and zoning designation of Downtown Mixed Use South (DMU-S). The purpose of the DMU-S land use is to encourage an integrated transit-oriented and mixed use neighborhood, extending the activity of City Center across Bollinger Canyon Road with shops, offices, and a diversity of housing opportunities set in an urban environment of walkable streets, parks and trails. The allowed density in the DMU-S land use ranges from a minimum of 20 dwelling units per acre to a maximum of 60 dwelling units per acre. Development is generally intended to be more vertical in nature and allowance for higher density closer to the arterial roadway, with an appropriate transitional buffer

adjacent to existing residential uses located to the south. While the Project is in a mixed-use zone, the Applicant has the ability to use State Density Bonus law to propose 100% residential use.

Development Standards:

The Project is within the DMU-S zoning district. The following are development standards for the subject property:

Table 1: Project Development Standards

Development Standard	City Standard (DMU-S)	Proposed Project
Minimum lot size	Determined through subdivision process	1.85 acres
Setbacks	Minimum 10 feet for front setback. Setbacks for side-interior, side-corner, rear, and accessory structure is determined through project review and approval	10 ft. front, Varies
Density	Minimum density of 20 dwelling units per acre and maximum density of 60 dwelling units per acre	54 dwelling units per acre
Floor Area Ration (FAR)	Sitewide minimum of 1.25 and sitewide maximum of 2.75	1.13
Maximum height	85 feet, except as limited by Daylight Plane Requirements (D2-15.A) and Section D3-6 (Height Limits and Exceptions)	46 feet
Landscaping	Minimum 15% of the lot	15.5% provided
Parking	179 spaces based on Zoning Code Parking requirement	110 provided (State Density Bonus Waiver)

The Project complies with the DMU-S development standards except for the minimum FAR and parking. The City's Zoning Code requires 179 parking spaces (100 covered, 50 uncovered, 25 guest stalls, and 4 spaces for daycare use). The maximum number of parking spaces that can be required under State Density Bonus Law is 125 spaces (50 spaces for the 0–1-bedroom units and 75 spaces for the 2–3-bedroom units). The Project proposes a total of 100 uncovered parking spaces for residents and guests, and 10 spaces for daycare use, and is eligible for a parking standard waiver under State Density Bonus Law based on its

commitment to deed-restrict of at least a minimum of 5% of housing units to very low-income households (the project proposes all units to be affordable to lower income households).

The Project will have a density of 54 dwelling units per acre, which is within the DMU-S development standards range of 20-60 units per acre; the Orchards Master Plan overall residential density of 46.3 dwelling units per net acre.

Building Layout and Setbacks:

The building is bordered by the Orchards Multi-Family District to the north and east, the Neighborhoods District to the south, the perimeter greenway and I-680 to the west. The site is accessed via two driveway entrances off Chevron Drive, with access to the surface parking via Drive A to the north and Drive C to the south; Emergency Vehicle Access (EVA) is provided at both entry points and will allow for emergency access around the entirety of the Project. The front setback along Chevron Drive is 10 feet and the rear setback abutting the greenway ranges from 47 feet to 50 feet. The minimum side yard setback to the north is 61 feet and the south side setback is 49 feet. The building will have a maximum height of 46 feet where up to 70 feet is permitted. The building layout is consistent with the Zoning Ordinance objective standards.

Building Architecture and Landscape

Architecture:

The proposed architecture can be characterized as a contemporary style with a variety of massing and material finishes as shown in the renderings below. Building finishes include a combination of cement plaster, extruded aluminum battens, and aluminum slat siding. The color palette incorporates brown, beige, and grey colors on the building massing, with dark charcoal tones on the window mullions.

Figure 3: Proposed Color Schemes and Materials Board

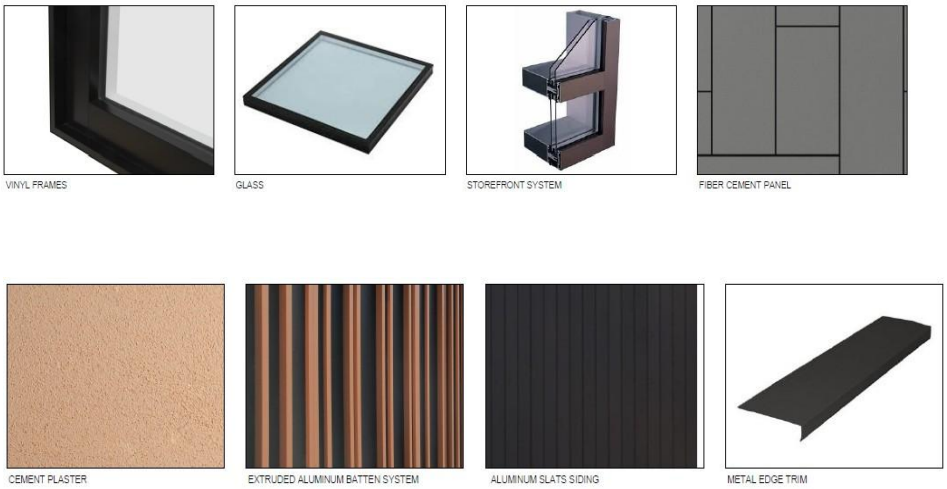


Figure 4: Building Rendering Residential Lobby Entrance Plaza

Figure 5: East Façade on Chevron Drive

Figure 6: Childcare Lobby Entrance Plaza

Figure 7: South Façade and Courtyard

Figure 8: North Elevation

Figure 9: South Elevation

Figure 10: East Elevation

Figure 11: West Elevation

Parking

As described above, the project includes a total of 110 parking spaces for residents and the daycare center use, which includes 100 spaces for the residential units and 10 spaces for daycare use. Under State Density Bonus law, the Project is eligible for a parking standard waiver based on its commitment to deed-restrict all units to be affordable to lower income households, aside from one on-site manager's unit.

Landscape Design

The Applicant has provided a conceptual landscape plan layout that identifies the specific planting areas in relation to the Project site including perimeter landscaping, residential courtyard and childcare play area, and bio treatment areas as shown in Figure 12. Residents will have access to the perimeter greenway on the left, including a meandering pathway and play area.

Figure 12: Conceptual Landscape Plan

Figure 13 includes approximately 4,000 sq. ft. of courtyard with a community garden, play area, grill and picnic benches, and perimeter greenway access along the western property line. Ten trees are proposed within the courtyard area to provide shade with other planned planting. The childcare play area will be surrounded by landscape treatments including a few shade trees and enclosed by a 7-foot wooden fence.

Figure 13: Courtyard Landscape Plan

The Planting Schedule and Planting Palette show a variety of trees, shrubs, grasses, and groundcovers. Compliance with the Model Water Efficiency Landscape Ordinance (MWELO) will be required. Use of reclaimed water will be required unless determined to be infeasible by the Zoning Administrator and may impact the final plant selection. Figure 14 provides imagery of the plant palette proposed for the Project.

Figure 14: Plant Palette Imagery

A photometric lighting plan has been provided on Sheet LT1 and will be reviewed and confirmed for compliance with City standards prior to Building Permit issuance.

Affordable Housing

The Project is subject to the City's inclusionary housing standards, which requires a minimum of 15% of the units for low and very low-income households. The Orchards Affordable Apartments are proposed as 100% affordable for households earning up to 80% of area median income. The Project includes requested concessions to reduce the number of parking spaces, and to reduce the number of interior parking lot trees. The Project qualifies

for four concessions under State Density Bonus Law and is currently being evaluated for the total number of waivers and concessions necessary for the Project.

Discussion Topics:

Staff requests the Architectural Review Board review the proposed Project and provide comments and direction using the following questions as a guide for discussion:

Site Layout

1. In general, does the Board support the proposed site layout, and vehicle/pedestrian circulation? Why or why not?

Building Architecture

1. Is the proposed architecture appropriate in design, scale and massing? Is the proposed architectural design theme appropriate for this site and consistent/compatible with the established architectural styles in the project vicinity? Why or why not?

2. Does the Board feel that the project building has met the City's 360-degree design philosophy? Why or why not?

3. Does the Board support the proposed building materials, colors scheme, architectural finishes, and trim detailing? Why or why not?

Landscape

1. Does the landscape palette and overall site plan provide appropriate species selection and sufficient quantities/sizes and variety of plant materials? Why or why not?

2. In general, does the Board support the proposed landscape concept? Why or why not?

Recommendation:

Staff recommends the Architectural Review Board review and discuss the proposed Project and provide direction to the Applicant and staff recommending final architectural review.

PROJECT DESCRIPTION

THE PROJECT INCLUDES DEMOLITION OF A PARKING LOT WITH SOLAR PANELS TO CONSTRUCT A NEW MULTI-FAMILY RESIDENTIAL BUILDING. THE BUILDING PROPOSES TO HOUSE 99 BELOW MARKET RATE RESIDENTIAL UNITS AND 1 MANAGER'S UNIT FOR A TOTAL OF 100 RESIDENTIAL UNITS.

THE PROJECT ACCOMMODATES ABOUT 3,000 SF OF LOBBY AND AMENITIES THAT INCLUDE A COMMUNITY ROOM, COMPUTER LAB AND AFTER SCHOOL SPACE.
110 SURFACE PARKING SPACES ARE ACCOMMODATED INCLUDING 10 SPACES DEDICATED TO A CHILDCARE FACILITY SUPPORTING THE ENTIRE ORCHARDS COMMUNITY. 104 BICYCLE SPACES ARE ACCOMMODATED IN AN ENCLOSED BIKE STORAGE FACILITY.

THE BUILDING IS A 4 STORY MULTI-FAMILY STRUCTURE WITH 4 STORIES OF TYPE VA CONSTRUCTION.

TYPICAL BIORETENTION DETAIL

NOT TO SCALE

SPECIAL PROJECT NON-LID TREATMENT REDUCTION CREDITS

SPECIAL PROJECTS CATEGORY "C":

AFFORDABLE HOUSING CREDIT (FROM TABLE 1A): 100%

- TOTAL NUMBER OF DWELLING UNITS: 100
- TOTAL NUMBER OF MANAGER'S UNITS: 1
- TOTAL NUMBER OF DWELLING UNITS FOR AFFORDABLE CREDIT CALCULATION: 99

- LOW (<80% OF AMI): 74 UNITS (75%)
- VERY LOW (<50% OF AMI): 25 UNITS (25%)
- WEIGHTED SUM: 125%
- ALLOWABLE AFFORDABLE HOUSING CREDIT: 100%

TOTAL MAX. NON-LID CREDIT ALLOWED: 100%

SPECIAL PROJECT NON-LID TREATMENT CREDIT NOTES:

1. PROJECT QUALIFIES FOR 100% LID REDUCTION CREDIT AND MAY TREAT 100% OF RUNOFF USING NON-LID METHODS IF LID IS INFEASIBLE.
2. PROJECT PROPOSES TO TREAT APPROXIMATELY 10% OF THE IMPERVIOUS SURFACES USING LID TREATMENT METHODS (ROADSIDE BIORETENTION).
3. PROJECT PROPOSES TO TREAT APPROXIMATELY 90% OF THE IMPERVIOUS SURFACES USING NON-LID TREATMENT METHODS (MEDIA FILTER)
4. MEDIA FILTER SIZING AND SPECIFICATIONS ARE SUBJECT TO FINAL DESIGN. MEDIA FILTERS AND SIZING METHODS WILL BE WASHINGTON G.U.I.D. AND T.A.P.E. CERTIFIED UNITS.
5. PROPOSED MEDIA FILTER: OLDCASTLE PERK FILTER 6' X 12' CONCRETE VAULT WITH 18" CARTRIDGES (INSTALL 13 OF THE 15 AVAILABLE CARTRIDGES)
   - 5.1. TOTAL TREATMENT FLOW RATE REQUIRED: 124.3 GPM (0.277 CFS)
   - 5.2. TOTAL TREATMENT FLOW RATE PROVIDED: 132.6 GPM (0.295 CFS)

1	BIORETENTION	FLOW	9,617	7,794	1,823	7,976	319	331

STORMWATER TREATMENT SUMMARY (MEDIA FILTER)

DMA	TREATMENT TYPE	SIZING METHOD	TOTAL DMA AREA (SF)	IMPERVIOUS AREA (SF)	PERVIOUS AREA (SF)	RUNOFF FACTOR - IMPERVIOUS	RUNOFF FACTOR - PERVIOUS	COMPOSITE RUNOFF FACTOR "C"	INTENSITY (I) (IN/HR)	MIN REQUIRED TREATMENT FLOW (CxIxA) (CFS)
2	MEDIA FILTER	FLOW	89,176	64,141	25,035	0.9	0.1	0.68	0.2	0.277

NOTES:

1) ALL TREATMENT MEASURES AND TECHNICAL REQUIREMENTS FOR THIS PROJECT ARE BASED UPON THE CONTRA COSTA CLEAN WATER PROGRAM, STORMWATER C.3 GUIDEBOOK 9TH EDITION DATED APRIL 12, 2024 AND REVISED JUNE 2025.
2) ALL STORMWATER SIZING IS PRELIMINARY AND SUBJECT TO FINAL DESIGN.
3) THE PROJECT IS PART OF THE OVERALL ORCHARDS DEVELOPMENT AND WILL DRAIN TO INFRASTRUCTURE TO BE INSTALLED WITH THE ORCHARDS PROJECT. AS THE OVERALL PROJECT WILL INCREASE THE TOTAL IMPERVIOUS AREA, THE OVERALL PROJECT IS SUBJECT TO HYDROMODIFICATION REQUIREMENTS. PEAK FLOW MITIGATION FOR PARCELS I1 AND I12 IS PROVIDED WITH THE OVERALL ORCHARDS PROJECT. SEE THE ORCHARDS STORMWATER CONTROL PLAN FOR ADDITIONAL INFORMATION, SIZING CALCULATIONS, ETC. THE POST-DEVELOPMENT FLOWS WILL BE MITIGATED TO NOT EXCEED PRE-DEVELOPMENT FLOWS. THE BAY AREA HYDROLOGY MODEL (BAHM) SOFTWARE HAS BEEN USED TO CALCULATE WATER QUALITY PERCENT FILTERED AND MITIGATED STORMWATER FLOWS.

WATER EFFICIENT LANDSCAPE (MWELO) WORKSHEET - NON-RESIDENTIAL

Project Information

Date	9-Oct-2025
Project Applicant	RHAA Landscape Architecture and Planning
Project Address	8001 Bellinger Canyon RD, San Ramon, CA 94583
Total Landscape Area	26,214 sq ft
Project Type	New
Water Supply Type	Potable
Project Contact Project Applicant	Manuela King (Principal RHAA), PH: (415) 383 7900
Project Contact Project Owner	Eden Housing Inc.

"I agree to comply with the requirements of the water efficient landscape ordinance and submit a complete Landscape Documentation Package"

Manuela King CA LA # 3271

Name of City San Ramon
Reference Evapotranspiration (Eto) = 45 inches/year

Hydrozone (a)			Plant Description	Plant Factor (PF) (g)	Irr Method (h)	Irrigation Efficiency IE (e)	ETAF (PF/IE) (f)	Landscape Area (sq ft)	ETAF x Area	Estimated Total Water Use (ETWU) (a)
REGULAR LANDSCAPE AREAS										
Z-1			Courtyard	Low	0.3	Drip	0.81	0.37	3,496	1,295	36,125
Z-2			Entry Plaza	Low	0.3	Drip	0.81	0.37	816	302	8,432
Z-3			Parking Area	Low	0.3	Drip	0.81	0.37	8,389	3,107	86,686
Z-4			Greenbelt	Low	0.3	Drip	0.81	0.37	13,182	4,882	136,214
Z-5			Bioretention	Mod	0.8	Spray	0.75	0.80	331	265	7,388
								TOTALS	26,214	9,851	
									(A)	(B)	
SPECIAL LANDSCAPE AREAS (SLA)											
Recycled Water								0		0	0
								TOTALS	0	0	
									(C)	(D)	
										ETWU Total	274,846
										Maximum Allowed Water Allowance (MAWA) (c)	329,117

(a) **Hydrozone #/Planting Description** E.g. 1.) front lawn 2.) low water use plantings 3.) medium water use planting

(h) **Irrigation Method** overhead-spray or drip

(e) **Irrigation Efficiency** 0.75 for spray head; 0.81 for drip

(a) **ETWU (Annual Gallons Required)** = *ETo x 0.62 x ETAF x Area* where 0.62 is a conversion factor that converts acre-inches per acre per year to gallons per square foot per year.

(c) **MAWA (Annual Gallons Allowed)** = *[Eto] (0.62) [(ETAF x LA) + ((1-ETAF) x SLA)]* where 0.62 is a conversion factor that converts acre-inches per acre per year to gallons per square foot per year, LA is the total landscape area in square feet, SLA is the total special landscape area in square feet.

(f) **ETAF Evapotranspiration Ajustment Factor** Average ETAF for Regular Landscape Areas must be 0.55 orbelow for residential areas, and 0.45 or below for non-residential areas.

ETAF Calculations

Regular Landscape Areas		
Total ETAF x Area	9,851	(B)
Total Area	26,214	(A)
Average ETAF	0.38	(B/A)

All Landscape Areas		
Total ETAF x Area	9,851	(B + D)
Total Area	26,214	(A + C)
Sitewide ETAF	0.38	(B + D) / (A + C)

(g) **Plant Factor**

Very Low Water Use	0.1
Low Water Use	0.1 - 0.3
Moderate Water Use	0.4 - 0.6
High Water Use	0.7 - 1.0

IRRIGATION NOTES

1. REFER TO PLANS, DETAILS AND SPECIFICATIONS FOR IRRIGATION SYSTEM COMPONENTS, INSTALLATION, MAINTENANCE, SCHEDULING, AND REPORTING REQUIREMENTS.
2. THE CONTRACTOR SHALL COMPLY WITH LOCAL WATER DISTRICT PROCEDURES & REQUIREMENTS, ALL CITY OF VACAVILLE REQUIREMENTS, AND THE STATE WATER EFFICIENT LANDSCAPE ORDINANCE. ORDINANCE CRITERIA HAS BEEN APPLIED ACCORDINGLY FOR THE EFFICIENT USE OF WATER IN THE IRRIGATION DESIGN PLAN.
3. THESE IRRIGATION DRAWINGS ARE DIAGRAMMATIC AND INDICATIVE OF THE WORK TO BE INSTALLED. ALL PIPING, VALVES, AND OTHER IRRIGATION COMPONENTS ARE TO BE INSTALLED WITHIN PLANTING AREAS TO THE GREATEST EXTENT POSSIBLE. DUE TO THE SCALE OF THE DRAWINGS, IT IS NOT POSSIBLE TO INDICATE ALL OFFSETS, FITTINGS, SLEEVES, CONDUIT, AND OTHER ITEMS WHICH MAY BE REQUIRED.
4. THE CONTRACTOR IS TO INVESTIGATE THE EXISTING AND PROPOSED FINISHED CONDITION OF THE WORK. THE CONTRACTOR SHALL IMMEDIATE NOTIFY THE OWNER'S REPRESENTATIVE OF ANY CONFLICTS AND/OR DISCREPANCIES BETWEEN EXISTING AND PROPOSED CONDITIONS WHICH WILL AFFECT THE WORK, BEFORE PROCEEDING WITH THE WORK. IN THE EVENT THESE NOTIFICATIONS ARE NOT PERFORMED, THE CONTRACTOR ASSUMES FULL RESPONSIBILITY FOR REQUIRED REVISIONS.
5. THE CONTRACTOR SHALL COORDINATE ALL WORK WITH OTHER TRADES, INCLUDING THE INSTALLATION OF ALL PIPE, CONDUIT AND SLEEVES THROUGH OR UNDER WALLS, ROADWAYS, PAVING AND STRUCTURES.
6. PRIOR TO TRENCHING AND DIGGING, CONTACT USA "811" TO LOCATE ALL UNDERGROUND UTILITIES. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MINOR CHANGES IN THE IRRIGATION LAYOUT DUE TO OBSTRUCTIONS NOT SHOWN ON THE IRRIGATION DRAWINGS SUCH AS UNDERGROUND UTILITIES, VAULTS, ETC. THE CONTRACTOR SHALL AVOID CONFLICTS WITH UNDERGROUND UTILITIES, NEW PLANTING, SITE OR ARCHITECTURAL ELEMENTS, AND EXISTING TREES; ANY DAMAGE TO THESE CAUSED BY THE INSTALLATION OF THE IRRIGATION SYSTEM SHALL BE REPAIRED AND/OR REPLACED AT NO EXPENSE TO THE OWNER.
7. DO NOT TRENCH OR INSTALL IRRIGATION PIPING OR EQUIPMENT IN LIME-TREATED SOIL.
8. THE CONTRACTOR SHALL VERIFY FLOW RATE AND PRESSURE AT THE POINT OF CONNECTION PRIOR TO THE INSTALLATION OF THE IRRIGATION SYSTEM AND NOTIFY THE OWNER'S REPRESENTATIVE OF TEST RESULTS BEFORE CONSTRUCTION BEGINS. NOTIFY LANDSCAPE ARCHITECT IF PRESSURE IS GREATER OR LESS THAN THE STATIC PRESSURE STATED ON THE PLANS TO DETERMINE IF PRESSURE REGULATION OR A BOOSTER PUMP IS REQUIRED.
9. THE CONTRACTOR SHALL OBTAIN AS-BUILT IRRIGATION DRAWINGS OF ALL EXISTING IRRIGATION SYSTEM(S) FROM THE OWNER'S REPRESENTATIVE FOR REFERENCE DURING NEW AND RETROFIT WORK.
10. CONTRACTOR TO FIELD VERIFY CONDITION OF ALL EXISTING IRRIGATION EQUIPMENT IMPACTED BY NEW CONSTRUCTION AND REPAIR AND REPLACE AS NECESSARY.
11. INSTALL ALL IRRIGATION EQUIPMENT PER MANUFACTURER'S RECOMMENDATIONS.
12. INSTALL ONE SPARE COMMON AND CONTROL WIRE FROM EACH CONTROLLER IN A CONTINUOUS LOOP THROUGH EACH VALVE BOX FOR FUTURE USE.
13. WHERE PIPE SIZES HAVE BEEN OMITTED OR THERE IS A CONFLICT, REFER TO THE LATERAL PIPE SIZING CHART FOR SIZES. AS CHANGES IN LAYOUT OCCUR DURING STAKING AND CONSTRUCTION, PIPE SIZES MAY NEED TO BE ADJUSTED ACCORDINGLY. ALL LATERAL END RUNS SHALL BE 1" SIZE UNLESS OTHERWISE NOTED.
14. THE REMOTE CONTROL VALVES SPECIFIED ON THE DRAWINGS ARE PRESSURE REDUCING TYPES. SET THE DISCHARGE PRESSURE AS RECOMMENDED BY MANUFACTURER.
15. CONTRACTOR TO ASSUME (4) ADDITIONAL CONTROL VALVES TO BE INSTALLED AS NEEDED.
16. LARGE AREAS OF ORNAMENTAL GRASSES ARE TO BE IRRIGATED BY A DEDICATED CONTROL VALVE.
17. ALL IRRIGATION BOXES AND LIDS TO BE BLACK.
18. LOCATE BUBBLERS AND EMITTERS ON UPHILL SIDE OF PLANT OR TREE.
19. CONTRACTOR TO MAINTAIN EXISTING PLANTED AREAS THROUGHOUT CONSTRUCTION AND COORDINATE OPERATIONS TO KEEP EXISTING PLANTING AREAS ALIVE AND HEALTHY. EXISTING AND NEW IRRIGATION SYSTEMS SHALL BE INSTALLED, ADJUSTED AND MAINTAINED TO PROVIDE 100% COVERAGE OF PLANTING AREAS AND TO PREVENT MISTING, OVERSPRAY AND RUNOFF ONTO BUILDINGS, WALLS WINDOWS, PAVED AREAS, ETC.
20. FLUSH AND ADJUST IRRIGATION EMITTERS, NOZZLES AND OUTLETS FOR OPTIMUM PERFORMANCE AND TO PREVENT OVER SPRAY ONTO WALKS, ROADWAYS, AND/OR BUILDINGS. SELECT THE BEST DEGREE OF ARC AND RADIUS TO FIT THE EXISTING SITE CONDITIONS AND THROTTLE THE FLOW CONTROL AT EACH VALVE TO OBTAIN THE OPTIMUM OPERATING PRESSURE FOR EACH CONTROL ZONE.
21. CONTRACTOR SHALL MAKE FINAL CONNECTION BETWEEN ELECTRICAL SUPPLY AND THE CONTROLLER, AND BETWEEN THE MAIN LINE AND WATER SOURCE AT THE POINT OF CONNECTION(S).
22. THE INTENT OF THIS IRRIGATION SYSTEM IS TO PROVIDE THE MINIMUM AMOUNT OF WATER REQUIRED TO SUSTAIN GOOD PLANT HEALTH. IT IS THE RESPONSIBILITY OF THE LANDSCAPE MAINTENANCE CONTRACTOR TO PROGRAM THE IRRIGATION CONTROLLER(S) TO PROVIDE THE MINIMUM AMOUNT OF WATER NEEDED TO SUSTAIN GOOD PLANT HEALTH. THIS INCLUDES MAKING ADJUSTMENTS TO THE PROGRAM FOR SEASONAL WEATHER CHANGES, PLANT MATERIAL, WATER REQUIREMENTS, MOUNDS AND SLOPES, SUN, SHADE AND WIND EXPOSURE.
23. THE CONTRACTOR SHALL COORDINATE VALVE NUMBERING, CONTROLLER OPERATIONS AND PROGRAMMING WITH OWNER'S REPRESENTATIVE.
24. STATION OPERATION TIMES SHALL NOT DELIVER WATER EXCEED THE SOIL INFILTRATION RATE(S) AS DETERMINED BY THE SOILS REPORT(S).
25. THE CONTRACTOR SHALL PROVIDE THE OWNER'S REPRESENTATIVE WITH CLEAR AS-BUILT PLANS OF THE INSTALLED OF IRRIGATION SYSTEM.

IN-LINE DRIP IRRIGATION NOTES

1. INSTALL IN-LINE DRIP IRRIGATION PER MANUFACTURER'S RECOMMENDATIONS.
2. BURY DRIP LINES PER DETAILS FOR BEST WATER DISTRIBUTION THROUGH THE SOIL AND TO PREVENT POTENTIAL DAMAGE FROM VANDALISM.
3. USE A CENTER FEED LAYOUT WHERE EVER POSSIBLE. INSTALL DRIP LINES IN LONG, LINEAR RUNS WITHOUT EXCEEDING THE RECOMMENDED MAXIMUM LENGTH OF A SINGLE LATERAL BASED ON DESIGN PRESSURE, SPACING AND FLOW RATE.
4. INSTALL MANUAL FLUSH VALVES AT THE LOW ENDS OF EACH ZONE AND SUB ZONE TO FLUSH DEBRIS FROM TECHLINE CV.
5. INSTALL OF AN AIR RELIEF VALVE AT THE HIGHEST POINT OF EACH ZONE/VALVE.
6. INSTALL DRIP ZONE OPERATION INDICATOR FOR EACH ZONE AS SHOWN ON PLANS.
7. INSTALL PVC SUPPLY AND EXHAUST HEADERS ON ALL ZONES AND SUB ZONES. HEADERS SHOULD BE SIZED PER MANUFACTURER'S SIZING CHART AND BASED ON FLOW RATE.
8. A SINGLE, LARGE DRIP ZONE WILL LIKELY HAVE SEVERAL SMALLER SUB ZONES THAT WILL ALSO REQUIRE CENTER-FEED LAYOUTS, PVC SUPPLY AND EXHAUST HEADERS AND FLUSH VALVES. THE EXACT LAYOUTS OF ZONES AND SUB ZONES SHALL BE DETERMINED BY THE CONTRACTOR IN THE FIELD BASED ON TECHLINE DETAILS SHOWN ON PLANS.
9. WHERE DRIP LINE ENCOUNTERS A PLANT ROOT BALL, LAY LINE ON TOP OF OR DIRECTLY NEXT TO THE ROOT BALL AS SHOWN ON PLAN DETAILS.
10. INSTALLATION ON SLOPES REQUIRES INSTALLATION OF CHECK VALVES TO PREVENT LOW-END DRAINAGE AS SHOWN ON PLAN DETAILS.

Notes

1. Luminaire Schedule should be read in conjunction with Architectural & Services drawings
2. Before ordering, it is the Contractor's responsibility to ensure lead times of luminaires are within programme
3. Catalogue Numbers / Order codes are indicative only. Where there is a discrepancy between the specified luminaire information and the catalogue number provided clarification MUST be sought from Electrolight before ordering.
4. All Luminaire Finishes to be confirmed by Architect before ordering.
5. Any changes to the document are shown in **bold** *italics*.

Notes

* Not supported in Conversion* Accessory Must be ordered separately using AccuOne Products to Locate Family #to Ascertain Assembly.
1. Contact your Electrolight representative for additional configurations and options and fixture compatibility for all applications. Refer to full series pages #MSA-S44A-740-U-T3-DM for additional support information.
2. Pole Mounting Hub Plate Required for Pole Mounting. Hub Plate Ordered Separately. Refer to Accessories Section on Tenon Mount Adapter Plate. Three Plate Three Wire Entry, Three Plate Four Wire Entry.
3. Not available with emergency battery pack (EMP) or 480V or 347V luminaires.
4. Available with NEMA, colors matching available paint request. Consult your lighting representative at Cooper Lighting Solutions for more information.
5. Custom and RAL colors matching available paint request. Consult your lighting representative at Cooper Lighting Solutions for more information.
6. Not available with 480V or 347V luminaires.
7. Not available with 480V or 347V, high voltage (A or K), or 1.2A drive current configurations. Universal voltage (UNV) and drive current, 1A, are base units. Rated to maximum 25C ambient operating temperature.
8. Luminaire tested to 6,000hrs per ASTM B117. Scribe rating of 8 per ASTM D1654.
9. Luminaire is IP66 rated when ordered with Photocontrol (PC) or Button Photocontrol (BP). Through-luminaire drain plate is painted black when the HSS option is selected.
10. Lumens may vary based on luminaire color and CCT as listed in tolerance.
11. Requires PM or PRC photocontrol receptacle option.
12. Requires Bird Deterrent Spikes (BDS), photocontrol receptacle, PR or PRC, or other controls systems (MS, UNR, DALI, or BMS).
13. Requires PM or PRC photocontrol receptacle (PR) option. Not available with motion sensor components (MS, MS/DALI, or UNR). Luminaire can be ordered with Motion Sensor Ready (MSR) option for future addition of motion sensor components (MS, or UNR). Luminaire can be ordered with Motion Sensor Ready (MSR) option for future addition of motion sensor components (MS, or UNR). Luminaire can be ordered with Motion Sensor Ready (MSR) option for future addition of motion sensor components (MS, or UNR). Luminaire can be ordered with Motion Sensor Ready (MSR) option for future addition of motion sensor components (MS, or UNR).
14. Contact your Electrolight representative for additional configurations and options and fixture compatibility for all applications. Refer to full series pages #MSA-S44A-740-U-T3-DM for additional support information.
15. Not available with 480V or 347V luminaires.
16. Not available with 480V or 347V luminaires.
17. Not available with 480V or 347V luminaires.
18. Not available with 480V or 347V luminaires.
19. Not available with 480V or 347V luminaires.
20. Not available with 480V or 347V luminaires.
21. Requires Receptacle for internal step down transformer when combined with sensor options. Not available in combination with the Although ambient and sensor options at HA.

Product Specifications

Construction
- Die-cast aluminum main housing and permanent mold spider mount base maintain a minimum IP66 ingress rating
- Integral aluminum heat sink provides superior thermal performance, enabling use in +40°C ambient temperatures at full power
- Top-mounted door assembly, heavy wall, die-cast aluminum door maintains a nominal 0.125 inch gasket
- Door includes a 4.3" stainless steel safety tether standard or an optional self-retaining interior hinge
- Continuous silicone gasket provided to seal housing and door, and optional vandal screws
- Flexible luminaire arm mounting to housing provide access to luminaire interior

Optics
- 17 patented AccuLED high efficiency soalway and area optical distributions
- Optics are rated for a rigid light control; available factory-installed or as field-installed accessory

Electrical
- LED drivers mount to die-cast aluminum back housing for optimal heat sinking, superior efficacy and long service life
- Standard drivers feature electronic universal voltage (120-277V 50/60Hz; 347V 60Hz or 480V 60Hz) operation, with a high power factor, less than 20% harmonic distortion
- 10kV surge protection provided standard
- Occupancy sensor and dimming options available

Mounting
- Tenon mounting mounts over 3"-3 1/2. Tenons via four concealed, steel set screws and jam-setscrews
- 1.5G vibration rated standard; option for 3G rated

Finish
- Housing is finished in five-stage super TGIC polyester powder coat (cast, 2.5 mil nominal thickness for superior protection against fade and wear. Consult factory for additional colors.
- Lightscapes cover plates are standard white and may be specified to match finish of luminaire housing
- RAL and custom color matches available

Compliance
- Luminaires feature an IP66 enclosure rating
- Available in Cordal Construction, salt spray tested to a minimum of 6000 hours per B117, with a scribe rating of 8 per ASTM D1654
- Housing and optics IK10 impact rated
- Luminaire is rated for use in wet locations
- cULus listed for use in -40°C to 50° environments
- BAA domestic preference option meets BAA requirements. See EO14017, PREFERENCES website or consult the CLS Domestic Preference Guide for more information.
- If FAR and ITA agencies are utilizing their BAA rules for BABA compliance. Cooper's products meet the requirements of manufacture in the US and utilize a BAA, 100% exemption rule for compliance. To verify a configured product with Domestic Preference Requirements, submit this catalog number to Cooper Lighting Quotation team for verification of Buy America Manufacturing Invoice. Please refer to the EO14005, FREEDOM ACT website or consult the CLS Domestic Preference Guide for more information.
- Components shipped separately may be separately analyzed under domestic preference requirements.

Warranty
- Five year limited warranty, consult website for details: www.cooperlighting.com/legal

LIGHTING FIXTURE CUTSHEETS - E02

COMFORT VUE collection — Louver Recessed — amerlux

PROJECT: **TYPE:**

Features

Amerlux's Comfort Vue product line is a family of linear fixtures offering industry best visual comfort while still maintaining a high performance. Precision molded louvers combine with mirrorized molded optics to basically eliminate glare. Each individual LED has its own optic to eliminate any color of angle issues. Louvers are offered in Frame Black, Glossy White or Polished Chrome. The family of products include pendant, monterey, surface mounting, recessed and perimeter mounting options. One of a kind offer in the fact that full configurability in the industry with increments of a single cell. Fully lit corners are also available.

Product Overview

Type:	Direct distribution with Recessed Mounting
Wattage/Ft:	3W, 4W, 5W, 6W, 7W, 8W, 9W, 10W
Color Temp:	2700K, 3000K, 3500K, 4000K
CRI:	90+ typ.
Dimming (wired):	0-10V, Lutron, DALI
Dimming (wireless):	Lutron Athena,BubblyNet Bluetooth

Certifications

5 year limited warranty

LIGHTING FIXTURE CUTSHEETS - E03

Bollard · Shielded with reflector · 360°

BEGA

Application
Bollard luminaire with rotationally symmetric light distribution. This robust luminaire provides glare-free illumination perfect for squares, pathways and entrances. Provided with mounting system that allows luminaire to be adjusted independent of anchor bolt orientation.

Materials
Borosilicate glass
Die-cast aluminium
Extruded aluminium
Marine grade, copper free (≤ 0.3% copper content) AD80.0 aluminium alloy
High temperature silicone gasket
Mechanically captive stainless steel fasteners
Pure anodized aluminium reflector

NRTL listed to North American Standards, suitable for wet locations
Protection class IP 65

Weight: 23.9 lbs.

Electrical

Operating voltage	120-277VAC
Minimum start temperature	-30° C
LED module wattage	20.6W
System wattage	25.0W
Controllability	0-10V dimming down to 1%
Color rendering index	Ra > 80
Luminaire lumens	1615lm
LED service life (L70)	60000Hrs

LED color temperature
☐ 4000K (K4)
☐ 3500K (K35)
☐ 3000K (K3)
☐ 2700K (K27)

BEGA can supply you with suitable LED replacement modules for up to 20 years after the purchase of LED luminaires – see website for details

Finish
All BEGA standard finishes are matte, textured powder coat with minimum 3 mil thickness. BEGA Unidure® finish provides superior fade protection in Black, Bronze, and Silver. BEGA standard White is a super durable polyester powder. Optionally available RAL, custom, and premium colors provided in polyester powder and/or liquid paint.

Available colors
